

myOWN skin™

INNOVATIVE BIOTECHNOLOGY ADVANCED WOUND CARE

MyOwn Skin™ is a painless, non surgical procedure which leverages a small sample of a patient's own skin to produce partial thickness skin grafts in one week.

1 Skin Sample

With a small sample of healthy skin the size of this circle...

...we can grow three 4"x4" (300cm²) patches of a patient's own skin in a week.
